# Fifty five years in science and the latter research results: Higher order integrals of motion for Schrödinger equation

*Anatoly G. Nikitin*

*Institute of Mathematics of the NAS of Ukraine, Kyiv, Ukraine*
E-mail: *nikitin@imath.kiev.ua*

A very short review of the scientific results obtained during my work in the Institute of Mathematics will be presented. The latter results in the field of superintegrable quantum mechanical systems will be discussed. These results consist in the complete description of 2d superintegrable systems admitting the second, third and fourth order integrals of motion.
